

MOHAMED RIFFATH

Mobile App Developer — Flutter, iOS (SwiftUI), Full-Stack (Node.js)

Dubai, UAE | +971 50 647 1697 | riffath.emedia@gmail.com

[linkedin.com/in/riffathrhm](https://www.linkedin.com/in/riffathrhm) | github.com/riffathRHM | riffath-portfolio.vercel.app

Nationality: Sri Lankan | Languages: English, Tamil, Sinhala | On a visit visa in Dubai, immediately available once status changes

PROFESSIONAL SUMMARY

Mobile and full-stack developer with 4+ years shipping production Flutter, React Native, and SwiftUI apps to the App Store and Google Play. Built features across 8+ published apps — payments, real-time chat/video, location-based booking, and push notifications. Cut deployment time 87% by moving a manual release process onto Docker and CI/CD, and helped grow active users 30% on an enterprise mobile banking app. Comfortable across the stack: Node.js, Express, MongoDB/PostgreSQL, REST API design, JWT/OAuth, Stripe, and MVVM/Clean Architecture. Based in Dubai on a visit visa and available to start as soon as sponsorship is arranged.

CORE SKILLS

Mobile: Flutter, SwiftUI, UIKit, React Native, Combine, Provider/BLoC, Riverpod, REST API Integration

Languages: Swift, Dart, JavaScript, TypeScript, Java, PHP, Python

Backend: Node.js, Express.js, RESTful APIs, JWT/OAuth

Databases: MongoDB, PostgreSQL, MySQL, Firebase Firestore, SQLite, Core Data

Integrations: Stripe, In-App Purchases, Agora.io, Google Maps, Firebase Cloud Messaging

Tools & Cloud: Git, GitHub, Bitbucket, Xcode, VS Code, Docker, CI/CD, AWS/GCP

Practices: Agile/Scrum, MVVM, MVC, OOP, Offline-First Architecture, App Store Deployment

PROFESSIONAL EXPERIENCE

Mobile Engineer — Native iOS / Flutter — Elegant Media Australia

Full-time, Remote (international clients) | Jun 2024 – Jul 2026 (2 yrs 2 mos)

- Build and maintain production Flutter and SwiftUI apps for international clients, owning everything from architecture through App Store release.
- Replaced a manual release process with Docker-based build environments and CI/CD automation, cutting deployment time 87%.
- Integrate REST APIs, authentication, payment gateways, push notifications, and third-party SDKs across multiple production apps.
- Built and maintain Provider/BLoC state management in Flutter to keep UI logic decoupled and testable as codebases grow.
- Debug production issues — memory leaks, UI jank, slow API calls — prioritizing by user-facing impact.
- Work with designers, backend developers, QA, and stakeholders in Git-based, pull-request-driven Agile workflows.

TeeTime NZ — Golf Tournament Booking Platform — [View on the App Store](#)

SwiftUI, REST APIs, Stripe, OAuth

- Built tournament discovery, registration, and booking functionality used across New Zealand.
- Integrated Stripe for tournament registration payments and implemented OAuth authentication.

Hairchog — Barber & Hairstylist Marketplace — [View on the App Store](#)

SwiftUI, REST APIs, Stripe, Google Maps, Agora.io

- Built barber/stylist discovery and booking with Google Maps location search and Stripe checkout.
- Implemented real-time chat and video via Agora.io so clients and stylists could connect directly in-app.

FitBlazer — Fitness & Wellness Marketplace — [View on the App Store](#)

Flutter, Firebase Firestore, Firebase Cloud Messaging, REST APIs

- Integrated Firestore for real-time data sync and Firebase Cloud Messaging for push notifications.
- Consumed REST APIs for bookings, user management, and provider data, driving engagement through activity discovery.

Mobile Application Developer (Flutter/React Native) — Cherry InfoTech

Contract, Doha, Qatar — Remote | Jun 2022 – Jun 2023 (1 yr 1 mo)

- Designed and shipped scalable cross-platform apps in Flutter and React Native for enterprise operations across iOS and Android.
- Built mobile banking features focused on security and performance, contributing to a 30% increase in active users for key financial clients.
- Integrated RESTful APIs, real-time data sync, and secure payment gateways with cross-functional teams.
- Used Provider, Riverpod, and Redux for state management, and MVVM/Clean Architecture to keep large codebases maintainable.
- Reduced app load times 25% and cut crash rates through targeted performance optimization.
- Contributed to CI/CD automation and unit, widget, and integration testing as part of the Agile process.

Mobile App Developer & Graphic Designer — Fiverr (Freelance)

Remote | Jan 2022 – Present

- Built mobile apps end-to-end for freelance clients in Swift, SwiftUI, and Flutter, including API integration, Firebase, and MVVM/Clean Architecture.
- Delivered UI/UX and graphic design work in Figma — app interfaces, landing pages, flyers, brochures, and social media graphics.
- Owned client engagements start to finish: requirements gathering, design, development, and delivery.

KEY PROJECTS

Offline-First Task Manager — github.com/riffathRHM/SmartTask-Pro

Flutter, Node.js, Express.js, TypeScript, PostgreSQL, Drizzle ORM, JWT, SQLite, Docker

- Built a task manager that works fully offline, with a local-first SQLite layer on-device.
- Designed a background sync engine that reconciles offline changes with PostgreSQL once connectivity returns.
- Implemented JWT authentication with persisted, validity-checked sessions so users stay logged in across restarts.

Multi-Vendor Marketplace Mobile App — [Backend](#) | [Flutter App](#) | [Admin Panel](#)

Flutter, Node.js, Express.js, MongoDB, Stripe, JWT, REST API

- Built a full-stack multi-vendor marketplace from scratch: vendor onboarding, product catalogue, cart, order tracking, and Stripe checkout.
- Designed role-based access control for 3 user tiers, backed by a JWT-secured, 20+ endpoint REST API.

Full-Stack Food Ordering Platform — github.com/riffathRHM/foodDelivery_MERN

React.js, Node.js, Express.js, MongoDB, JWT, Stripe

- Built a MERN food ordering platform with dynamic cart management, live order status, and Stripe payments.
- Implemented stateless JWT authentication with refresh token rotation for secure session persistence.

EDUCATION

Bachelor of Science in Computer Science

University of Jaffna, Sri Lanka | September 2020 – October 2023

CERTIFICATIONS

- Data Structures & Algorithms — Udemy
- IEEEExtreme 15.0 Competitive Programming Certificate
