

MOHAMED RIFFATH

Mobile & Full-Stack Engineer | Flutter | SwiftUI | React Native | Node.js

riffath.emedia@gmail.com | +94-767013040 | [LinkedIn](#) | [GitHub](#) | Willing to relocate to UAE Immediately

PROFESSIONAL SUMMARY

Mobile Engineer with 2+ years of experience developing and shipping production Flutter and SwiftUI applications for the App Store and Google Play. Contributed to multiple published applications including TeeTime NZ, Hairchog, FitBlazer, and How Did You Survive. Experienced in building scalable mobile solutions using SwiftUI, Flutter, Firebase, REST APIs, Stripe payments, OAuth authentication, Apple In-App Purchases, push notifications, real-time communication, and location-based services. Skilled in full-stack development using Node.js, Express.js, and MongoDB, with strong knowledge of MVVM architecture, CI/CD pipelines, and mobile application deployment. Seeking a Mobile Developer or Full-Stack Developer role in the UAE.

PROFESSIONAL EXPERIENCE

Mobile Engineer | Elegant Media Australia

2024 January – Present

- Develop and maintain production Flutter and SwiftUI applications for international clients.
- Integrate REST APIs, authentication systems, payment gateways, push notifications, and third-party SDKs.
- Collaborate with designers, backend developers, QA engineers, and stakeholders to deliver high-quality mobile applications.
- Participate in code reviews, testing, bug fixing, App Store releases, and production support.

TeeTime NZ

App Store: <https://apps.apple.com/nz/app/teetime-nz/id6755508981>

Tech Stack: SwiftUI, REST APIs, Stripe, OAuth

- Developed features for a golf tournament booking platform used across New Zealand.
- Integrated Stripe payment workflows for tournament registrations.
- Implemented OAuth authentication and secure user account management.
- Developed tournament discovery, registration, and booking functionality.
- Consumed REST APIs and improved application performance and usability.

Hairchog

App Store: <https://apps.apple.com/us/app/hairchog/id6752330010>

Tech Stack: SwiftUI, REST APIs, Stripe, Google Maps, Agora.io

- Developed features for a barber and hairstylist marketplace platform.
- Integrated Agora.io for real-time voice and video communication.
- Implemented Stripe payment processing for appointment bookings.
- Integrated Google Maps for location discovery and nearby service search.
- Developed appointment scheduling and booking management functionality.
- Consumed REST APIs for user, booking, and payment operations.

FitBlazer

App Store: <https://apps.apple.com/uz/app/fitblazer/id6751321157>

Tech Stack: Flutter, Firebase Firestore, Firebase Cloud Messaging, REST APIs

- Developed features for a fitness and wellness marketplace platform connecting users with fitness experiences across New Zealand and Australia.
- Integrated Firebase Firestore for real-time data synchronization.
- Implemented push notifications using Firebase Cloud Messaging (FCM).
- Consumed REST APIs for bookings, user management, and provider data.
- Enhanced user engagement through activity discovery and booking workflows.

How Did You Survive

App Store: <https://apps.apple.com/us/app/how-did-you-survive/id6733222990>

Tech Stack: SwiftUI, REST APIs

- Contributed to the development of a community-driven storytelling platform.
- Developed SwiftUI user interfaces and integrated backend APIs.

PROJECTS

Multi-Vendor Marketplace Mobile App

<https://github.com/riffathRHM/multistore-backend>

<https://github.com/riffathRHM/multistore-flutter>

Tech Stack:Flutter, Node.js, Express.js, MongoDB, Stripe, JWT, REST API

- Architected and built a full-stack multi-vendor marketplace from scratch — covering vendor onboarding, product catalogue, cart management, order tracking, and Stripe checkout for Android and iOS.
- Designed role-based access control (RBAC) supporting 3 user tiers (customer, vendor, admin) with JWT-secured APIs and middleware-level route protection.
- Structured a scalable REST API with 20+ endpoints following RESTful conventions, enabling clean decoupling between the Flutter frontend and Node.js backend.
- Integrated Stripe for secure online payments with webhook handling for order confirmation and payment status updates.

Full-Stack Food Ordering Platform

https://github.com/riffathRHM/foodDelivery_MERN

Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT, Stripe

- Built a MERN-stack food ordering web platform with dynamic cart management, real-time order status, and Stripe payment integration.
- Implemented stateless JWT authentication with refresh token rotation, supporting secure session persistence without server-side storage.
- Developed RESTful APIs for menu management, user accounts, and order processing, following REST conventions for clean frontend-backend separation.

TECHNICAL SKILLS

- **Languages:** Swift, Dart, JavaScript, Java ,PHP ,Python
- **Frontend (Web):** React.js,Redux,TypeScript ,Context API, HTML5, CSS3
- **Mobile Development:** Flutter, SwiftUI, UIKit, React Native ,Combine, REST API Integration
- **Backend:** Node.js, Express.js, RESTful APIs, JWT
- **Databases:** MongoDB ,MySQL, Firebase Firestore, Core Data, Local Storage
- **Tools &Cloud:** Git, GitHub, Bitbucket, Xcode, VS Code, CI/CD, AWS/GCP
- **Integrations:** Stripe, In-App Purchases, Social Login (OAuth)
- **Testing:** XCTest, Flutter Test, Unit Testing, Debugging
- **Concepts:** Agile/Scrum, MVVM, MVC, OOP, Performance Optimisation, App Store Deployment

EDUCATION

Bachelor of Science in Computer Science | University of Jaffna , Sri Lanka. Sep 2020- Oct 2023

CERTIFICATIONS

- **Data Structures & Algorithms – Udemy**
- **IEEEXtreme 15.0 Competitive Programming Certificate**
