PROFESSIONAL SUMMARY

Four years designing brand identities, logos, and illustrated content, plus two years inside international, cross-functional engineering teams as a mobile developer, and hands-on experience building websites with HTML, CSS, JavaScript, React, and Node.js. Started as an illustrator, so color theory, typography, and character design run through the work rather than sitting on top of it. Created Milo, an original AI-generated character brand, and grew it to 270K+ Facebook followers through AI-generated video, Meta Ads boosting, and performance analytics, with the page now monetized. Also write and produce RHAnimates, a personal YouTube channel of cinematic AI short stories, and coordinate social media and video editing across YouTube, TikTok, and Facebook for a food and travel brand. Separately delivered logos, brochures, and websites for freelance clients across several industries, holding a 25+ five-star review record on Fiverr. Comfortable developing concepts independently, folding client feedback in without losing the original idea, and running several projects at once against real deadlines, increasingly with AI tools and digital marketing practice (Meta Ads, SEO, analytics) built into the pipeline. Based in Dubai, available to start immediately.

DESIGN SKILLS

Core Strengths: Logo design & brand identity, illustration & drawing, color theory, character design, layout & typography, concept development

Software: Adobe Illustrator, Photoshop, InDesign, After Effects, Premiere Pro, Figma, Canva, CapCut

Deliverables: Logos, brochures, flyers, banners, social graphics, icons, original character illustration, print & digital collateral

Process: Client briefing, original concept sketching, stakeholder feedback & revisions, multi-project management, deadline-driven delivery

WEB DESIGN & DEVELOPMENT SKILLS

Languages & Frameworks: HTML, CSS, JavaScript, React, Node.js

Focus: Responsive, design-led websites and landing pages, translating brand identity and visual design directly into clean, functional front-end code, building and styling UI components with a designer's eye for layout, color, and typography

Workflow: Figma-to-code handoff, portfolio and client website builds, deployment (e.g. Vercel), integrating web design work with existing branding and marketing deliverables

DIGITAL MARKETING SKILLS

Paid Social & Growth: Meta Ads Manager (post boosting, audience targeting), organic content growth strategy, cross-platform posting (Facebook, Instagram, YouTube, TikTok)

Analytics & Monetization: Meta Business Suite / Facebook & Instagram Insights, YouTube Studio analytics, content performance tracking and reporting, Google AdSense familiarity

SEO: On-page SEO fundamentals, SEO-friendly title and hashtag research, upload-time research for reach, keyword-aware naming and metadata, discoverability best practices for portfolios and client web assets

AI TOOLS & AI-ASSISTED WORKFLOW

Concept & Ideation: ChatGPT, Claude, Google Gemini for brainstorming design directions and drafting client-facing copy and naming options before moving into Illustrator

Image & Prompt Generation: Bing AI (Image Creator), Google Gemini for generating mood boards and quick visual references before committing to final artwork

Motion, Video & Audio: Google Veo3 for fully AI-generated motion and video clips, ElevenLabs for voiceover and narration on motion graphics work

Productivity: Grok AI, ChatGPT for workflow notes and quick fact-checking to keep several client projects moving on deadline

DESIGN, WEB, MOTION GRAPHICS & MARKETING EXPERIENCE

Creator & Designer, Milo Animates (AI-Generated Animated Character Brand)

<https://facebook.com/profile.php?id=61585718408134>

- Created Milo, an AI-generated monkey character built purely for entertainment, and grew the page to 270K+ Facebook followers on fully AI-generated video clips.
- Used Google Veo3 for motion and video generation and Grok AI for concept ideation, keeping the character and visual style consistent across posts.
- Used Meta Ads Manager to boost top-performing posts and tracked results through Facebook/Instagram Insights to guide what to post next; the page is now monetized through Google AdSense.
- Ran the full creative pipeline solo, from prompt writing and concept direction through to final edit, treating each post as its own concept rather than a reused template.

Creator, RHAnimates (Personal YouTube Channel)

<https://youtube.com/@rhanimates?si=7t-95py8uzWuSY0i>

- Write, direct, and produce cinematic AI-generated short stories for RHAnimates, a personal YouTube channel built around narratives that connect emotionally with viewers.
- Own the full pipeline solo: story concept, scripting, AI video generation, and final edit for every release, keeping a consistent cinematic look and tone across episodes.
- Apply the same character design and visual storytelling background from illustration work to shape pacing, framing, and mood in each short.

Social Media Coordinator & Video Editor, Danny's World Cuisine

[YouTube](#) | [Facebook](#) | [TikTok](#) | [Instagram](#)

- Coordinate and edit short-form video only for Danny's World Cuisine, a channel covering a different country's traditional food and culture in each video, across YouTube, TikTok, Facebook, and Instagram.
- Research SEO-friendly titles and trending, niche-relevant hashtags for each video before publishing, and check country-specific content restrictions tied to the cuisine or location being featured.
- Research platform-specific upload times against past performance data to get better reach, and adjust the posting schedule accordingly.
- Adapt each short-form cut to the format and audience expectations of YouTube Shorts, TikTok, Facebook, and Instagram Reels from the same raw footage.

Graphic Designer, Web Developer, Fiverr (qwerty_works)

Jan 2022 – Present | Freelance, Remote

- Designed logos and brand identities for freelance clients across multiple industries, turning client briefs into original concepts in Adobe Illustrator, Photoshop, and Figma, holding a 25+ five-star review record on Fiverr.
- Designed and built responsive websites and landing pages using HTML, CSS, JavaScript, and React, translating client branding directly into functional, on-brand web experiences.
- Delivered brand and marketing collateral, including brochures, flyers, banners, social media graphics, and icons, applying consistent color theory, typography, and on-page SEO fundamentals (alt text, metadata, keyword-aware naming) to support discoverability.
- Owned client design and web engagements end to end: requirements gathering, concept sketching, feedback-based revisions, and final delivery, while managing multiple projects at once.
- Prepared print-ready and web-optimized final artwork, maintaining brand consistency across every deliverable.

ADDITIONAL EXPERIENCE

Mobile Engineer, Native iOS / Flutter, Elegant Media Australia

Jun 2024 – Jul 2026 | Remote, international clients

- Worked in a corporate, international, cross-functional environment alongside designers, QA, and stakeholders in an Agile, deadline-driven pipeline, shipping production work end to end for global clients.

Mobile Application Developer (Flutter/React Native), Cherry InfoTech

Jun 2022 – Jun 2023 | Doha, Qatar, Remote

- Collaborated with cross-functional engineering and design teams on enterprise-grade applications for financial-sector clients, applying the same concept-to-delivery workflow used on branding, illustration, and web projects.

EDUCATION

Bachelor of Science in Computer Science

Sept 2020 – Oct 2023 | University of Jaffna, Sri Lanka
