

MOHAMED RIFFATH

Mobile App Developer | Flutter | iOS (SwiftUI) | Full-Stack (Node.js)

Dubai, UAE (Visit Visa) | +971 50 647 1697 | riffath.emedia@gmail.com

[linkedin.com/in/riffathrhm](https://www.linkedin.com/in/riffathrhm) | github.com/riffathRHM | riffath-portfolio.vercel.app

Nationality: Sri Lankan | Languages: English, Tamil, Sinhala

Immediately Available — Eligible to work in UAE upon visa status change

PROFESSIONAL SUMMARY

Mobile & Full-Stack Developer with 4+ years of experience (professional and freelance) building and shipping production Flutter, React Native, and SwiftUI applications for the App Store and Google Play. Delivered features for 8+ published apps spanning payments, real-time communication, location-based services, and push notifications, including an 87% reduction in deployment time through Docker/CI-CD automation and a 30% increase in active users on an enterprise mobile banking platform. Skilled across Node.js, Express.js, MongoDB/PostgreSQL, offline-first architecture, REST API design, JWT/OAuth authentication, Stripe payments, and MVVM/Clean Architecture. Currently based in Dubai on a visit visa and immediately available to join UAE-based teams.

CORE SKILLS

- **Mobile:** Flutter, SwiftUI, UIKit, React Native, Combine, REST API Integration, Provider/BLoC, Riverpod
- **Languages:** Swift, Dart, JavaScript, TypeScript, Java, PHP, Python
- **Backend:** Node.js, Express.js, RESTful APIs, JWT/OAuth
- **Databases:** MongoDB, PostgreSQL, MySQL, Firebase Firestore, SQLite, Core Data
- **Integrations:** Stripe, In-App Purchases, Agora.io, Google Maps, Push Notifications (FCM)
- **Tools & Cloud:** Git, GitHub, Bitbucket, Xcode, VS Code, Docker, CI/CD, AWS/GCP
- **Concepts:** Agile/Scrum, MVVM, MVC, OOP, Offline-First Architecture, App Store Deployment

PROFESSIONAL EXPERIENCE

Mobile Engineer (Native iOS / Flutter) — Elegant Media Australia

Full-time · Remote — International Clients | Jun 2024 – Jul 2026 (2 yrs 2 mos)

- Develop and maintain production Flutter and SwiftUI applications for international clients, working end-to-end from architecture through App Store release.
- Reduced deployment time by 87% by introducing Docker-based build environments and CI/CD automation, replacing manual release steps with a repeatable pipeline.
- Integrate REST APIs, authentication systems, payment gateways, push notifications, and third-party SDKs across multiple production apps.
- Build and maintain state management using Provider/BLoC in Flutter, keeping UI logic decoupled and testable across growing codebases.
- Debug and resolve performance issues (memory leaks, jank, slow API calls) reported from live production usage, prioritizing user-facing impact.
- Collaborate with designers, backend developers, QA engineers, and stakeholders in Git-based, pull-request-driven Agile workflows.

TeetTime NZ — Golf Tournament Booking Platform (New Zealand)

Tech Stack: SwiftUI, REST APIs, Stripe, OAuth | App Store: apps.apple.com/teetime-nz

- Developed tournament discovery, registration, and booking functionality used across New Zealand.
- Integrated Stripe payment workflows for tournament registrations and implemented OAuth authentication.

Hairchog — Barber & Hairstylist Marketplace

Tech Stack: SwiftUI, REST APIs, Stripe, Google Maps, Agora.io | App Store: apps.apple.com/hairchog

- Built barber/stylist discovery and booking with Google Maps-based location search and Stripe checkout.
- Implemented in-app real-time chat/video via Agora.io to connect clients with stylists.

FitBlazer — Fitness & Wellness Marketplace (New Zealand & Australia)

Tech Stack: Flutter, Firebase Firestore, Firebase Cloud Messaging, REST APIs | App Store: apps.apple.com/fitblazer

- Integrated Firebase Firestore for real-time data synchronization and Firebase Cloud Messaging for push notifications.
- Consumed REST APIs for bookings, user management, and provider data, enhancing engagement through activity discovery.

Mobile Application Developer (Flutter/React Native) — Cherry InfoTech

Contract · Doha, Qatar — Remote | Jun 2022 – Jun 2023 (1 yr 1 mo)

- Designed, developed, and deployed scalable cross-platform mobile applications using Flutter and React Native, enhancing enterprise operations and customer engagement across iOS and Android platforms.
- Built and optimized mobile banking solutions with a focus on security, performance, and intuitive user experiences, contributing to a 30% increase in active users for key financial clients.
- Collaborated with cross-functional teams to deliver enterprise-grade apps, integrating RESTful APIs, real-time data synchronization, and secure payment gateways.
- Implemented efficient state management (Provider, Riverpod, Redux) and modular architecture (MVVM, Clean Architecture), ensuring code maintainability and scalability for large-scale mobile platforms.
- Drove continuous improvement by introducing performance optimization techniques, reducing app load times by 25% and minimizing crash rates across multiple enterprise applications.
- Contributed to Agile development processes, CI/CD automation, and comprehensive testing strategies (unit, widget, integration tests) to deliver high-quality, reliable mobile solutions.

Mobile App Developer & Graphic Designer — Fiverr (Freelance)

Remote | Jan 2022 – Present

- Designed and built mobile applications end-to-end for freelance clients using Swift, SwiftUI, and Flutter, including API integration, Firebase, and MVVM/Clean Architecture.
- Delivered UI/UX and graphic design work in Figma: mobile app interfaces, landing pages, flyers, brochures, banners, social media graphics, and icons.
- Owned client engagements end-to-end — requirements gathering, design, development, and delivery — across both design and development projects.

KEY PROJECTS

Offline-First Task Manager

Tech Stack: Flutter, Node.js, Express.js, TypeScript, PostgreSQL, Drizzle ORM, JWT, SQLite, Docker | github.com/riffathRHM/SmartTask-Pro

- Built an offline-first mobile app with full task-management functionality available with or without network connectivity.
- Designed a local-first data layer using SQLite on-device with a background sync engine reconciling changes with PostgreSQL once connectivity is restored.
- Implemented JWT-based authentication with persisted, validity-checked sessions so users remain logged in across app restarts.

Multi-Vendor Marketplace Mobile App

Tech Stack: Flutter, Node.js, Express.js, MongoDB, Stripe, JWT, REST API | [multistore-backend](#) / [multistore-flutter](#)

- Architected and built a full-stack multi-vendor marketplace from scratch covering vendor onboarding, product catalogue, cart, order tracking, and Stripe checkout.
- Designed role-based access control (RBAC) for 3 user tiers with JWT-secured APIs and a scalable 20+ endpoint REST API.

Full-Stack Food Ordering Platform

Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT, Stripe | github.com/riffathRHM/foodDelivery_MERN

- Built a MERN-stack food ordering platform with dynamic cart management, real-time order status, and Stripe payment integration.
- Implemented stateless JWT authentication with refresh token rotation for secure session persistence.

EDUCATION

Bachelor of Science in Computer Science — University of Jaffna, Sri Lanka

September 2020 – October 2023

CERTIFICATIONS

- Data Structures & Algorithms — Udemy
- IEEEExtreme 15.0 Competitive Programming Certificate
